ASIC Advantage and Jet Components Enter Into Distribution Agreement

April 4, 2008 - Sunnyvale, Calif. - ASIC Advantage, Inc. (AAI) is a rapidly growing mixed-signal IC manufacturer, announced that it has signed a distribution agreement with Jet Components, Inc. (Jet) to distribute its broadly expanding range of integrated circuits. The agreement gives Jet non-exclusive distribution rights throughout the North America, including the United States, Canada, Mexico and the Caribbean.

Jet Components is an authorized stocking distributor of electronic components, supplying high-technology products and services to consumers throughout the United States and abroad since 1988. Jet has expanded its offering from just providing quality semiconductors to include additional value added services - custom cable assemblies, tape and reel provision, kitting, procurement and bonded inventory management. Jet has a demonstrated track record of customer satisfaction, providing exceptional service with rapid response to inquiries and competitive pricing.

Jet Components is a growing distributor, which shares AAI's goals of providing the highest possible quality and service in a broad range of markets. Jet's services and complimentary product offerings facilitate the continued expansion of AAI's sales presence. The partnering of Jet and AAI will dramatically improve access to AAI's products, as it acts to greatly expand the quantity and range of provided mixed-signal solutions.

Any statements contained in this press release that are not statements of historical fact, including the performance, ruggedness and suitability of products for specific applications, may be deemed as forward looking statements. Various factors could cause the results to be different than stated or implied by these forward looking statements. As ASIC Advantage is a privately owned company, ASIC Advantage, Incorporated has no obligation to publicly communicate the results of any revisions to these forward looking statements.

About ASIC Advantage, Inc.

AAI is a privately owned, fabless semiconductor company that designs and manufactures mixed-signal ICs. In business since 1999, AAI has enjoyed substantial growth for over half a decade. ASIC Advantage's custom business covers the Automotive, Portable Audio, Power Management, Aerospace and Satellite markets. ASIC Advantage is also extending its portfolio, offering a broader range of standard products in Power Management, LED Lighting, Portable Electronics, Sensors and Instrumentation and Motor Controls. ASIC Advantage is known for its technical innovation, with the highest levels of quality and reliability.
